

**Reliability is most important for sterilisation packaging -
There is no problem using our polystar[®] film sealing machines!**

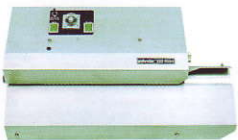

Everything can be surgically sealed: polystar[®] 244 and 245

Whether in dentists' or doctors' surgeries or on hospitals wards. With **polystar[®]** table-top sealers 244 + 245 everything that has to be kept sterile, can be packed securely and independent of size before sterilisation - in see-through film rolls or pouches. Sealers are so easy to use. The 8 mm wide sealing provides the best protection and prevents bacteria from penetrating into sterile packs.

Complete reliability: polystar[®] 418 M-RPA and 618 M-RPA

The new generation of sterile film magnetic table-top sealers 418 M-RPA + 618 M-RPA is equipped with the latest technology. Compile your individual sterile film sealing equipment to suit your own needs. Simply supplement this sealer with a cutter, plug-in work table and space saving film roll magazine. Automatic residual heat regulation and a 8 mm wide sealing seam makes this sealer reliable.

Consistent safety is vital: polystar[®] 620 DSM

The specialist for sterile film sealing! The continuous sealing machine 620 DSM is made of stainless steel. Using see-through pouches: The universally applicable speed sealer keeps its promises. The seal speed of 6.2 m/min. and the 12 mm broad seam secure strong seams but also an optimum peel effect can be ensured.

Guaranteed sterile: polystar[®] 980 DSM

Now you can seal and print in one step as **polystar[®]** 980 DSM is available on request with integrated dot-matrix printer. This means that the sterile pack can be sealed and at the same time the packing date, the expiry date and a three-figure code number can be printed across the 15 mm wide, perfectly secure sealing seam. The seal speed comes to 9.8 m/min.

You can never be too cautious: polystar[®] 850 DSM

In particular in the case of health care, sterilisation is the top priority. Innovations such as the TYVEK[®] sterilizations bags made of two top-quality plastic films present a challenge for us with which we are pleased to face. **polystar[®]** 850 DSM is our solution for an even safer future.

Always handy: polystar[®] Sterile Film Roll Magazines

Film roll magazines by **polystar[®]** are extremely practical. They fit in everywhere, keep things orderly and are always at hand. Whether table top or wall-mounted model - whether with or without cutter: These practical aids are always there where they are needed. Once you have worked with them, you will never want to be without them.

Progress is our business: Better safe than sorry!
